QUANTA ANNOUNCES "DISCOVERY PICO" THE MOST POWERFUL PICOSECOND DUAL WAVELENGTH MEDICAL LASER IN THE WORLD

San Francisco, USA - March 2015
American Academy of Dermatology

Quanta announced the international launch (USA excluded because the laser is not yet FDA cleared) of its novel and revolutionary "Discovery Pico", the most powerful dual wavelength picosecond medical laser in the world, able to work at 1064 nm and 532 nm both in picosecond and nanosecond regimes.

"The platform marks a breakthrough gap versus competition in terms of energy per pulse, peak power, fluence and irradiance" said Luca Cerri, VP Science and Technology of Quanta System SpA.

The system does not substitute Q-Plus C, which remains the most versatile three wavelengths platform for tattoo removal, toning and benign pigmentations.

The novel laser addresses instead the needs of those physicians who want to ensure faster outcome and results to their patients.

Discovery Pico can be watched at the American Academy of Dermatology in San Francisco, Moscone Centre (labeled as "Not for sales in the USA") at Quanta's booth 5418.

Its production launch and sales will start in early the second quarter of 2015.

The system is Patent Pending.

Enjoy and discover a new world of PICO !

Quanta System Q1
LASER IN OUR DNA

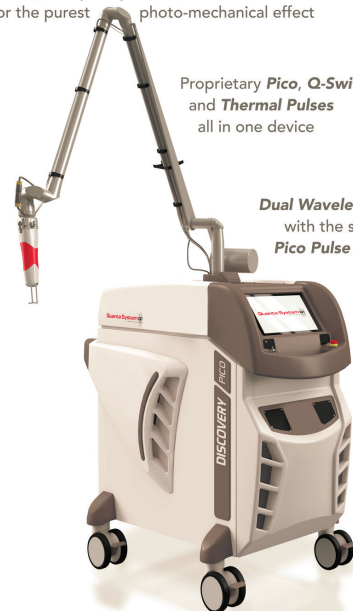

Taking care of people, our masterpieces

Are you ready for the **DISCOVERY PICO** Revolution?

The highest peak power **up to 1.8 GW**
for the purest photo-mechanical effect

Proprietary **Pico, Q-Switched**
and **Thermal Pulses**
all in one device

Dual Wavelength Laser
with the shortest
Pico Pulse available
