## Lipaway

Biological **cavitation** is a phenomenon which consists in the formation of vapor zones (bubbles) within interstitial areas of the body. Such bubbles use to implode provoking shock waves able to selectively damage the membranes of the fat cells (adipocytes).

Temperature influences cavitation, while altering the so called vapor tension. If temperature raises, vapor tensions increase and consequently favour the cavitation effect.

The intensity produced by the cavitational ultrasounds of Lipaway has great efficacy for the lysis of a consistent quantity of adipose mass, localized in areas such as abdomen, gluteus and thighs. After one treatment, it is possible an immediate reduction of the circumference down to 3 cm.

Lipaway, with its *Selective Subdermal Body Shaping*<sup>®</sup> technique, allows quick treatments, excellent and stable results. It works with efficacy also without pre-injection of hypotonic intra-lipo-therapeutic liquids.

### SUBDERMAL BODY SHAPING ADVANTAGES

- Important reduction of adiposis, avoiding traditional surgical intervention (liposuction) or laser assisted liposuction.
- Visible results since the first session
- No anesthesia
- No down-time
- Very fast pay-back of the investment

#### TECHNICAL SHEET

|                       |                               |
|-----------------------|-------------------------------|
| Frequency             | 36 kHz                        |
| Modulation            | Sweeping                      |
| Max power density     | 3 W/cm <sup>2</sup>           |
| Display               | 8.4" TFT TouchScreen          |
| Input voltage         | 110 or 230 VAC                |
| Max consumption power | 250 VA                        |
| Dimensions            | L 430mm<br>W 300mm<br>H 200mm |
| Weight                | 10 Kg                         |

Pre-set selectable protocols allow fast and safe treatments.

The combination of Lipaway with a lymphatic drainage, after each treatment, through compression, vacuum or other massage techniques (operator based or mechanical) guarantees the maximum reduction in terms of centimeters.

Lipaway is easily transportable due to its small size and reduced weight.
