Vitamin Boost

Dr Irena Eris Vitamin C + AHA 35% Anti-Wrinkle and Illuminating Treatment restores skin luminosity, evens skin tone and smoothes out fine line and wrinkles after just one appointment. The main active ingredient is Vitamin C, which is a vital compound in collagen synthesis to keep the skin supple and firm. It also brightens skin discoloration, strengthens and seals blood vessels, thus reducing skin redness and at a concentration of 20 per cent and above it, exfoliates the skin. Dr Irena Eris has created Vitamin C pills that are dissolved in AHA (alpha hydroxy acid) liquid with very low pH 2.0 just before the treatment for an intense revitalising, anti-wrinkle and illuminating effect. Preparation of the solution immediately before the treatment guarantees the highest effectiveness and stability of the product.

Gynae Solution

Advanced Esthetics Solutions has launched She-Lase, the first laser with mixed modality using CO2 and 1540nm for Gynaecology. Manufactured by Quanta Systems, the pioneers of mixed modality, these two tried and tested wavelengths were chosen for their significant clinical results with minimal post-treatment recovery, unlike most of other lasers for vaginal treatments who are using just ablative lasers. She-Lase treats vaginal atrophy, stress urinary incontinence, vulvar remodelling and vaginal rejuvenation. What's more, the She-Lase's unique scanner functions enable the practitioner to control the level of energy, pulse width and duration in each modality, while the vaginal probe with its pyramidal reflector enables you to target the mucosa at 90°, 180° and 360° without the rotation of the handpiece, which can be very uncomfortable for the client.

Body Beautiful

Lipofirm Pro technology uniquely combines two technologies – TriLipo Radiofrequency (RF) and TriLipo Dynamic Muscle Activation (DMA). Working simultaneously using a single applicator, they create a synergistic effect that delivers a triple action: non-invasive fat removal and lymphatic drainage, as well as skin tightening. The TriLipo triple action effect is visible from the first treatment. Long-term body shaping is achieved in a minimal number of treatments. The treatment has a number of benefits, including focused fat reduction, cellulite improvement, long-term circumferential decrease, skin tightening and firming, facial contouring, wrinkle reduction, detoxification and improved drainage, enhanced blood circulation and oxygenation, and lifting, toning and firming of muscles.

Fast Results

Renew Skin Clinic in Dublin is the only salon in Ireland to offer Icoone, a machine that offers skin firming, tightening, reduction of cellulite and inch loss, even on stubborn areas that aren't responding to diet, exercise or invasive. Icoone is a non-invasive 30-minute treatment that offers extraordinary results even on the most difficult cases. The patented Roboderm technology stimulates every millimetre of the skin, using hand-held rolling devices that provide a relaxing massage. A minimum of two treatments per week is recommended over a five-week period for best results.
